

Content Portfolio Playbook

Cancellation Risk × Engagement Signal → Portfolio Action

	Low Engagement	High Engagement	
High Risk	Sunset 98 shows e.g. The Waterfront Do not renew, wind down quietly	Harvest-and-End 148 shows e.g. Alice in Borderland Conclude storyline, no new seasons	How to Use This Playbook Each cell maps a show's risk and engagement to a concrete portfolio action. Risk score XGBoost cancellation probability (0–1). Engagement score Proxy: vote count + popularity + seasons (median split). Use the action label to drive your Monday renewal decision.
Medium Risk	Renew Cautiously 36 shows e.g. Bet Renew with reduced budget, monitor closely	Renew Aggressively 66 shows e.g. Arcane Prioritize renewal, increase marketing	
Low Risk	Renew Cautiously 608 shows e.g. Star Search Renew with reduced budget, monitor closely	Green-Light 529 shows e.g. Stranger Things Expand budget, order next season	

Top Cancellation Risk Drivers

Key Insights

- Seasons signal survival**
More seasons = lower cancellation risk.
- Popularity beats ratings**
Engagement volume outweighs raw score.
- Genre is a secondary factor**
Sci-Fi & Comedy carry highest genre risk.
- Recency raises risk**
Newer shows face higher early cancellation.

Model Performance

- ROC-AUC**
0.871
